Smart solutions for animal professionals.

KULZER
MITSUI CHEMICALS GROUP

Long-lasting, breathable protection – combined with natural care.

From the very first spray:
Highly effective and
long-lasting protection!

Technovit 2-Protect – The protective spray with the PLUS of care

Technovit 2-Protect is the innovative protection spray for claws, skin, and horn – formulated with premium ingredients like zinc oxide and tea tree oil to promote the natural regeneration of skin, strengthen resistance, and provide long-lasting protection.

Its direct application, easy handling, and immediate effectiveness make Technovit 2-Protect an essential companion for everyday use in the barn.

Technovit 2-Protect – effective protection and support for the natural healing process.

Your Benefits

- **Full protection from the very first spray**
Microfine spray with consistent active ingredient distribution
- **Free from antibiotics – No documentation required**
- **No formalin, copper, or other harmful substances**
- **Aqua-Stop Film**
Adhesive protective film, resists dirt and moisture
- **AirFlow Membrane**
Natural, breathable protective barrier
- **With tea tree oil and zinc oxide**
Protection, care, insect stop. Supports regeneration
- **Color indicator – cool mint**
Always visible: for precise application and easy reapplication control

Application Area

Technovit 2-Protect is suitable for multiple applications – Suitable for claws, udders, and other skin areas

- Supports wound care in cases of skin injuries
- May aid in the natural recovery of irritated or eczematous skin
- Care for interdigital dermatitis
- Prophylaxis during periods of high infection pressure in the barn

Application

Shake well before use. Spray from a distance of ca. 20 cm onto the cleaned area. It is recommended to fully cover the affected area.

Caring for animal health today is always an investment for tomorrow's success.

+ Fast: Easy application – instant effect

Direct application to the cleaned claw or skin area, even when still damp. **Quick-drying**, highly efficient, excellent adhesion – **does not run**, spray nozzle does not clog. Suitable for both localized and large-area application, **easy to dose**. Also **compatible with automatic milking systems (AMS)**.

+ Safe: No harmful substances, no extra effort

The formula is **free from formalin, copper**, and other harmful substances. The effective natural active ingredient complex allows for the **avoidance of antibiotics – no documentation** required. The intensive **color indicator** ensures **optimal dosing** and **control** by clearly showing treated areas and when reapplication is needed.

+ Effective: Strong, long-lasting immediate protection – gentle, regenerative care

The innovative production process gently micronizes the active ingredients and ensures **homogeneous distribution**. The applied **protective film reliably shields** against moisture and contamination without blocking skin respiration. Despite its **water barrier**, the natural AirFlow membrane remains **breathable** and permeable to air, optimally supporting the healing process.

„Supports animal health and aligns with the growing trend of reducing antibiotic use in livestock farming.“

Daniel Klingberg, Product Manager Veterinary Medicine
